

Mineral concentrate “Halite”, Grade B

TU 08.93.10-003-37011412-201

Mineral concentrate "Halite", is intended for use as a raw material for the preparation of deicing material, drilling fluids, for the oil and chemical industries, for chemical water treatment, and other purposes.

MAIN TECHNICAL CHARACTERISTICS

| Main specifications | Normal values for the grade |
|--|---|
| Appearance | Coarse crystals of a grayish-white color interspersed with different colors |
| Mass concentration of sodium chloride, %, at least | 93 |
| Mass concentration of water insoluble residue, %, not more | 2,5 |
| Humidity, %, not more | 5,0 |
| Granulometric composition, share of the fraction, % | Granulometric composition is not rationed |

Package

Bulk
Big-bags

Shelf life

No expiry date

Transportation

“Halite” is transported in bulk or in packaged form by all means of transport in accordance with the rules for the carriage of goods in force on this type of transport

Production sites

LLC “EuroChem – Usolsky potash complex”, Berezniki, Permskiy Krai, Russian Federation.
